OF WEST VIRGINIA AND OHIO.

The oil from the fields of Ohio, Pennsylvania and West Virginia has made more men rich than any other product taken from the ground. Leading financiers of the United States have made their original fortunes in Oil. Here is an opportunity to invest in a company that will make all its shareholders realize large returns on their investment and be assured of a lifetime income.

FINANCIAL.

The Shares of This Company Are Now Being Bought by the Most Conservative People in the United States.

THIS COMPANY 🤿 ∩ PRODUCING

and Room on Its Property for Over 1,000 More.

This company produces the highest grade of Commercial Oil, not fuel oil such as California and Texas, which has no market and

The oil produced has an immediate market. The management of the Company is in the same safe, conservative hands as the Sand Fork Petroleum Company, and thousands of subscribers from ocean to ocean can testify to the marvelous success of that Company, which started paying dividends of 12 per cent, per year and in 60 days increased dividends to 36 per cent, per year. And the management is positive the Sand Fork Extension Oil Co. will be a still better investment to its stockholders.

This is a legitimate oil stock, which you will buy if you investigate.

The rapid development of the property increases the value of the stock, and it will soon be selling on the open market at a higher figure.

EQUITABLE LAND AND OIL CO.

Can be purchased for 10 CENTS. We expect TWO GUSHERS in less than 15 days. Well No. 1 between 80 and 80 feet deep: No. 2, 400 to 500. Upon bringing in Well No. 1, stack will advance to 25 cents; No. 2, 50 cents to \$1.00. If you desire to share in the profits with us, act quickly. REPORT NO. 2.

Since making report No. 1, we are pleased to say that the EQUITARLE LAND AND OIL COMPANY have been successful in securing an additional holding on Spindle Top, and under more favorable conditions than are often presented. While it is not a special pleasare to rejoice over the mistortures of others, we cannot help congratulating the stockholders of the Emilable on its recent purchase. One of the smaller companies operating in the field, by mismanuscement became very much emberrassed, after having succeeded in sinking his well to a depth of 30 feet. In other works, through shortreightedness, they becam work while there was yet a deed of trust on the real estate, and no provision had been made for paying the driller, and after having progressed as monthoned above, they were threatened with a fore-los-nire, which meant a total loss of their property. The Equitable fortunately having sufficient money on hand, relieved them of their contract by paying the obligations, and having the transfers made to the company. Now, by reason of this, we can hope for two "gushers" within the next 15 or 20 days. As mentioned in our former report, the well No. 1 is now about 150 feet, and our late purchase from the unfortunate company, the well is 300 feet. After the transfers are all duly made, we will give you the name of the institution which we have taken over, and will complete the well and trust to bring in a gusher in 4 or 5 days. This means, of course, a large increase in your stock, without any increased capitalization of the Equitable. Immediately upon completing the two wells above neutroned, work will begin on well No. 3, and we trust within 50 or 30 days to have completed all the contracts. As stated above, we shall continue our efforts exclusively to the development in the proven field, and with the incomme our forms exclusively to the development in the proven field, and with the incomme of the new year we hope to be able to amounce the fact that the Equitable is owner of six great "gushers" on Spinelle Top. This means

be worth \$5.00.

Stock of the company will remain on sale for only a few days longer at the original price of 10 cents, after which time it will be advanced to 25 cents until "gusher" No. 2 is completed, then it will be withdrawn from the market permanently. Now, if you wish to take advantage and increase your beldings with us, you can do so within the next few days, for we assure you it will be the only opportunity to buy stock at the original price.

Par value of stock, 10 cents. No orders taken for less than 50 shares (\$5.60). Remit by money order or bunk draft.

SHIPPING OIL IN BULK TO CALCUTTA.

This is the first shipment of the kind ever lieved the day is not far distant when a This is the first shipment of the kind ever made from a United States port by steamer and will be the first cargo of American oil that has ever passed through the Suez Canal. On July 4, 1999, the British bark Calcutta salled from here for Calcutta with a similar cargo. This was the initial attempt of shipping oil in bulk to the Far East.

Believed the day is not far distant when a scaling versel will be as great a novelty carrying oil to Portugal as she now is in carrying the same product to United Kingdom ports.

The oil shipments from Philadelphia to foreign ports through the competition now existing are rapidly increasing in volume. So far this year 28,46,601 gallons have been shipped from Philadelphia, an increase of almost 52,60,660 gallons over last year's exports during the corresponding period.

The Standard recently chartered a steam-ship to load 4,000 barrels and about 20,000 cases of refined oil at this port for Lisbon. The Standard will thus gain its first en-trance into Pertugal.

For several years the Standard has eyed

Direct Shipments Will Also Soun

Be Made to Portugal by
the Trust.

For several years the Standard has eyed with envy this particular trade, and in order to be able to control it, it was necessary to buy out a large local receiver at the port of Lisbon and turn his property into a place for the reception of oil cargoes.

The Lisbon and Operto trade in oil has been carried an with success by small selfthe Trust.

The Lisbon and Oporto trace in oil has been carried on with success by small salling vessels for many years, and the maximum cargoes shipped to these two ports have never exceeded 4,000 barrels in any one vessel. As soon as the Standard establishes cleared for Calcutta direct with 200,000 gallons of lubricating oil, valued at \$46,000.

The Lisbon and Oporto trace in oil has been carried on with success by small salling vessels for many years, and the maximum cargoes shipped to the second with the salling of the salling of the day is not far distant when a

PLAYERS TO BE NUMBERED.

Innovation That Will Add to In terest of the Rugby Game.

EPUBLIC SPECIAL New York, Oct. 12.-There is a possibility that the difficulty of distinguishing the players at big football games will be ob-literated in the near future. The way out of the difficulty seems to be in numbering the players, and that will be tried by the Chicago University's head coach this fall. The names of the entire university foot-ball squad will be printed on the pro-gramme, with a number after each name. The number corresponding to the man will be painted on his suit. The spectators, by looking at the programme, can tell who is playing and who is making the plays.

Visit "BEARLAND" with the chil-dren. Comic Section of The Sunday Republic. They'll like it.

A Broad Hint.

"Papa has forbidden you to come to the house. He says you are a dangerous man."

"Dangerous! What can be mean?"

"He says you are the kind of man who will hang around a girl all her life and never marry her."—Life. A Broad Hint.

Notice to Consumers of Fuel.

We take pleasure in making the announcement that we are now prepared to make contracts under a satisfactory guarantee, extending over a period of five years, to furnish the celebrated Beaumont Fuel Oil in unlimited quantities, and at a cost far less than that of coal or any other fuel. We solicit correspondence of Railroads, Steamships and the large consumers of the Northwest. A practical demonstration of the value of this oil has been made in the most satisfactory way by several of the great systems of railroads leading into Texas, and it is unquestionably the fuel of the future, and we are in a position to make a fixed rate that will reduce your present outlay for fuel from 25 to 50 per cent for the next five years. If you will kindly furnish us with the amount of fuel consumed daily by your enterprise, we will take great pleasure in quoting you a price upon the above conditions. Address all correspondence, or call on
